EDUCATION

November 2023

MANLY SELECTIVE CAMPUS | CURL CURL, SYD

- Software design development, Biology, Chemistry, Physics, 4 unit Maths, Advanced English

Current

UNSW | KENSINGTON, SYD

- Computer Science and Electrical Engineering Double Degree

SKILLS

- Source control
 - Extensive knowledge of Github and Bitbucket
 - Understanding of agile, scrum and other development approaches
 - Use of Atlassian tools to facilitate these approaches
- Languages
 - Experience with Assembly, C, C++, CSS, Java, JS, PHP, Python, Rust
 - Primarily focused on JavaScript and C
- Testing and Debugging techniques
 - Creation of test cases, test data, and test environments utilizing cypress
 - Use of elements such as flags, breakpoints and output expressions
- Operating Systems
 - I natively run windows
 - Linux through WSL (Debian and Ubuntu)
- Front-End development
 - CSS styling including Selectors, Pseudo classes and elements
 - HTML construction including containers, tags and types
 - JS functionality including classes, objects, and asynchronous functions
- Back-end development
 - Server hosting and creation
 - Fetch and response functions
 - Data handling and optimisation

CERTIFICATIONS

- Working with Children check
- First Aid course
- ATAR
- Majority of UNSW makerspace machines
